## Summary

As a computer science student, I am seeking an international internship for summer 2026 (I am available from May 11th to August 28th) to apply my technical skills and contribute to innovative projects.

## Work Experience

**Apprenticeship - Ampere Software Technology (Renault Group)** Sept 2024 - present

Development of software tools for the automation and reliability enhancement of software-defined vehicle (SDV) testing. Design of a Python library to generate realistic datasets and a Rust application (RMES) leveraging the GraphQL API to extract and structure messages, integrated within a CI/CD pipeline.

**Apprenticeship - European Systems Integration** Sept 2022 - Jul 2024

- Java application development for exporting data in JSON format from a remote database.
- Automated testing development in Java using Selenium and TestNG, followed by migration to TypeScript with Cypress.

## Projects

**rust-chip-8** Link to the repo

Development of a CHIP-8 emulator in Rust, focusing on efficient instruction decoding, precise timing, and accurate rendering, with an emphasis on performance, safety, and code clarity.

**Ticket to Ride** 3rd year

Group project: Development of a text-based Ticket to Ride game in Java, featuring multiple AI bots with different playing strategies, focusing on game logic, strategy implementation, and collaborative design.

**FISK** 1st year

Development of Fisk, a variant of Risk featuring bankers, implemented in Java with a JavaFX graphical user interface, focusing on game mechanics, UI design, and multiplayer interaction.

## Education

| | |
|---|---|
| 2024 - present | Engineering Degree in Computer Science at **Polytech Nice - Sophia Antipolis** |
| 2022 - 2024 | University Diploma in Computer Science (DUT) at **IUT Nice Côte d'Azur** |
| 2022 | French Baccalauréat – Scientific Track, ESABAC specialty |

## Skills

| | |
|---|---|
| Programming Languages: | Rust, C, C++, Java, Python, TypeScript, ASM |
| Tools and Technologies: | CI/CD pipelines, Git, Docker, GraphQL, REST APIs |
| Technical Skills: | Object-Oriented Programming, Systems Programming, Networking and Security, Virtualization, Web Development |
